

## Matic 315 CM CNB

photo: Matic 315 CM CNB

Fully automatic sawing machine working by hydropneumatic system. CN controlled bar stop, extremely fast and precise.

- Bundle loader magazine L= 6000mm (capacity 4000 Kg) for tubes and bars.
- Feeding system within pressure rollers including a measuring roller with encoder for trim cut.
- Clamping system with two independent vices.
- Machine cycle managed by Siemens PLC.
- Trim cut process with enable/disable switch.
- Hydropneumatic system with manometer and independent settings for feeding rollers , vices pressure , feeding head, cutting pressure.
- Unloading and cutting length L = 3000mm with mechanical length stop of standard selection for the piece to be regulated manually.
- Automatic separation of the scraps (trim cut and end of the bar) .
- Safety carter.
- Head with vertical stroke, assembled on hardened prismatic guides.
- Two speeds motor, standard speed 12,5-25 or 25-50 or 50-100 rpm
- Maximum diameter of the blade up to 315mm.

Matic 315 CN with K2 head
